

Landowner's Goals

Note: A landowner's goals may evolve during the plan development process. Please discuss your goals with your plan writer.

What forest management activities would you like to accomplish on your land over the next 10 to 20 years?

Please check the box that indicates your level of interest for the following forest management goals.

Potential Forest Management Goals	Not Applicable	Not Important	Somewhat Important	Very Important	Comments
Protect soil resources	<input type="checkbox"/>				
Protect water quality (rivers, lakes, etc)					
Maintain or improve biological diversity					
Enjoy beauty, scenery and aesthetics					
Hunting (indicate preferred game species)					
Recreation other than hunting (indicate activity)					
Produce timber for commercial harvest					
Produce firewood					
Produce other non-timber forest products					
Plant trees or shrubs					
Improve wildlife habitat (indicate species)					
Protect threatened or endangered species					
Forest health – insects, disease, invasive plants					
Protect archeological, cultural or historic features					
Protect unique natural features					
Protect or restore wetlands
